

FAQ'S FOR TRUCK AND TRAILERS

Where can I install a machine?

- Anywhere inside or outside your facility that has 4 feet clearance.

What structure do I need to have available for installation?

- No structural changes required, only an area to install an overhead festoon system, 220V plug (single or 3 phase) and a regular city water tap.

What drainage do I need?

- System only uses 3 to 5 gallons of water a minute, approximately the same as a pressure washer. Regular sewer drainage is only requirement.

Do I need permits to install?

- No, this system is equivalent to a piece of equipment such as a pressure washer.

How many trucks/trailers can I wash per hour?

- Typical time to wash and rinse less than 5 minutes.

What kind of specialized training for staff is required?

- Machines and system are all automated. One usage is usually the simple training.

What kind of washing can we do?

- Any vehicles 14 feet tall and under can be washed in 5 minutes or less.

How are the brushes for paint?

- Soft polyethylene brushes have been used for over 25 years with no issues. Upgrade to foam brushes is also available depending on graphics.

How long do brushes last?

- Estimates on current usage for polyethylene is 15,000 washes (double for foam).

How do you replace brushes?

- Brushes are in 1 foot sections. Easy as replacing two screws and two bolts/nuts.

How much soap is used per wash?

- Less than 1 ounce per minute.

Can I add more chemicals than just soap?

- Yes, there are options for rinse, degreaser, wax, Reverse Osmosis, soft water, etc.

What are the benefits over handwashing?

- Staff stays dry and clean. Wash time requires minimal physical effort.

What benefits will this system add to my customer service?

- Control your image by washing at your desires.
- Anyone can wash, thus keeping staff engaged in customer service.
- Keeps staff energetic, happy, dry and washing with little effort.

What benefits can this system add to revenue?

- You have the ability to add a truck wash option for the public or customers that will pay for the convenience, thus allowing more traffic to your truck dealership.

What are the maintenance requirements of this system?

- Very low requirements versus any other system on the market. We have service programs available on a yearly package to enable any request. Parts are all warehoused and available for immediate delivery.
